Chosen Image Descriptions + Reflection Notes

Project	Image / Asset	Rejection Note
Agentic BI Builder	demo.gif (full, in motion) (real image)	Frame 0 of gif alone was rejected. Shows empty terminal, proves nothing
Financial Risk Monitor	Scenario Explorer dashboard page (real image)	Forecast / Risk Analysis / Portfolio Overview pages rejected. Wrong side of the Monte Carlo vs. VaR argument, or no specific claim attached
StudyGapAI	Diagnostic Report screenshot (real image)	Study plan rejected. Sequencing isn't diagnosis; case study text itself needs a reframe pass, still open
SolarSense	4-model architecture diagram (to be built by you) (AI image)	Pure structure, no ownership signaling. Models 1-4 equal weight, only ML-vs-deterministic distinction preserved
Alzheimer's Classification	Confusion matrix, annotated with rejection framing (AI image)	Training curves rejected, same problem as the matrix, no counter-framing possible on a line chart the way there is on a matrix
Personal Image	AI edited image of real photo of myself (real image)	Edited via AI to assist with professional look

Your Diagnostic Report

Generated on 11/10/2025

Diagnostic Summary

Your performance indicates significant knowledge gaps across multiple topics, particularly in trigonometry, calculus, and geometry. You need to focus on building a strong foundation in basic mathematical concepts before tackling more complex problems. Consistent study and seeking help when needed will be crucial for your improvement.
